WHAT YOU WILL LEARN SEMINAR HIGHLIGHTS

Dog owners like you are tired of not knowing the right way to make sure their dogs stay happy and healthy. Commonly available information is often tied to commercial interests and much of it is confusing and often even dangerous.

JOIN OUR PANEL OF EXPERTS and learn the unbiased and straightforward answers to all of your canine questions, including:

- ✓ **What should I feed my dog?** We tell you which foods are really best for your dog, and which to avoid at all costs.
- ✓ **Understanding difficult canine behaviour.** A step-by-step demonstration on how to deal with and understand different dog personalities.
- ✓ **Spending hundreds of dollars a year on expensive treatments and cures for you dog?**
We show you which ones are the most effective and which ones you may be throwing money away on.
- ✓ **How to really read dog food labels.**
- ✓ **Why dog-training TV shows are not as effective as they seem.**
- ✓ **How to really communicate with your dog.** The answers may surprise you!
- ✓ **By-passing prescription drugs.** Discover natural remedies that really work.
- ✓ **PLUS much, much more!**

Space is Limited!

Don't miss this opportunity

Please make sure to attend this event that gets behind the clutter and commercial interests of widely available information and teaches you everything you've always wanted to know about being a better care giver to your dog.

ABOUT OUR PANEL OF EXPERT SPEAKERS

MONICA SEGAL Monica Segal is certified in Animal Health Care through the University of Guelph with studies in animal nutrition, physiology, diseases and parasites, as well as pet care. She has been a regular guest on Talk 640 Radio, interviewed on Breakfast Television and City TV in Toronto, KFVB in Los Angeles and Pet Talk hosted by Mitch Wilder. She writes featured articles in many publications throughout North America. Monica conducts seminars and workshops, hosts an Internet discussion group at K9Kitchen, and authored a book called "K9 Kitchen, Your Dogs' Diet: The Truth Behind The Hype". Respecting the needs of individual dogs translates to feeding a diet that supports uniqueness. The notion of there being one perfect way to feed all dogs is a myth and Monica believes the choice is based on the dog owner's comfort level with a particular method of feeding and the dog's tolerance level of that choice.

CAT CINO Cat Cino runs The Cat & Jack K9 Safety Program and is a certified trainer in Kennel Management, Obedience Dog Training, Puppy Management, Behaviour Modification, Personal Protection Dog Training and Police Dog Training. She has assisted with Guide Dogs and trained therapy dogs. In 1995, Cat recognized a need for educational seminars in dog bite prevention. Since then, she has delivered her safety message to thousands of Canadian children. Cathie is a published author, TV personality and expert witness for canine related civil action suits.

DR. AUTUMN LOUISE DROUIN, D.V.M., N.D. Dr. Autumn, as she is known to her patients, specializes in holistic veterinary care. As a naturopathic veterinarian, Dr. Drouin helps companion animals attain and maintain optimal health. Nutrition and natural therapies and modalities are used to support detoxification and achieve a state of balance. The result is true healing which manifests as a general improvement in overall well-being and the disappearance of symptoms.

TAKING CARE OF YOUR DOG

YOUR ANSWERS TO CANINE NUTRITION, BEHAVIOUR AND HEALTH

SEMINAR AGENDA

MORNING

TOPIC: What should I feed my dog? SPEAKER: Monica Segal

Probably one of the most common questions ever asked, Monica gets behind the myths and misconceptions about canine diets and shows you how to really evaluate the food you feed your dog. You will learn easy-to-implement tactics to improve your dog's diet. This session will give you the knowledge you need to be able to fully understand dog-food labels and realize optimal health throughout the life of your pet.

In this informative lecture you will also learn about the best use of dietary supplements for your dog and how to be pro-active today to ensure a better tomorrow for your pet.

TOPIC: Why are so many vets against home-prepared diets, yet so many people are feeding them? SPEAKER: Monica Segal

In light of the recent pet food scares, more and more concerned pet caregivers are turning to home prepared diets for their dogs, making these diets more popular today than they have been since store-bought dog food was even invented!

Learn the facts you must know to evaluate whether a home-prepared diet is right for your dog and how to avoid common mistakes and media hype when considering this "one size does not fit all" approach to your dog's food. Session will conclude with a Q & A opportunity.

AFTERNOON

TOPIC: Why TV training shows are not always the most effective way to work with your dog. SPEAKER: Cathie Cino

Learn to think like a canine and better understand your dog's mind with this fun and interactive session that shows you how to better understand the often misrepresented world of canine behaviour.

Cathie uses her years of experience as a dog trainer to get behind the myths of some of the most popular canine training TV shows and demonstrates why pack leadership does not always equal calm and submissive dogs.

TOPIC: Dealing with difficult canine behaviour. What you don't know can hurt you. SPEAKER: Cathie Cino

Dealing with aggressive dogs is generally not a situation anyone wants to find themselves in. If you do, you will be much better prepared after learning Cathie's tips on dealing with potentially dangerous dogs.

Cathie will show you how to spot the early signs of unfavourable dog behaviour and take the necessary action to keep everyone safe. You will learn some of the reasons why dogs bark, snarl and snap and the best ways to avoid dog bites. Session concludes with a Q & A.

TOPIC: By passing prescription drugs: Natural Remedies that really work. SPEAKER: Dr. Autumn Drouin, DVM, N.D.

Confused by all of the natural solutions available for your dog? Dr. Drouin gets behind the hype and tells you which remedies really work and which to avoid at all costs.

Dr. Drouin will provide some quick and easy natural solutions for some common ailments affecting your dog including holistic cures for fleas; allergies and other afflictions traditionally healed with expensive and often unnecessary prescription drugs.

TOPIC: Understanding Holistic Veterinary medicine: Is it right for my dog? SPEAKER: Dr. Autumn Drouin, DVM, N.D.

Holistic medicine is becoming increasingly popular for pet-lovers seeking a more balanced solution for their companion animals. Dr Drouin combines traditional veterinary medicine with the latest advances in nutrition and natural therapies to achieve true healing and balance.

Learn how you can improve your dog's well being and become a better care giver to your pet with the latest breakthroughs in holistic veterinary medicine. Session concludes with a Q & A.
